Abstract

This study looked into the study habits of the BSTED students of the Northern Iloilo Polytechnic State College, Estancia Iloilo during the school year 2001-2002. This research further attempted to ascertain the significant differences in the study habits among the students classified as to gender, high school graduated from and monthly family income. The study considered areas of study habits such as schedule, attitude, reading, study place. note taking, remembering, examination, parental guidance and teacher influence. The questionnaire on the study habits adopted from Reyes et. al. (1996) was utilized for the study. The mean and standard deviation were the descriptive statistics used. The t-test and one way analysis of variance (ANOVA) set at 0.05 significance level were the inferential statistical tool used. The respondents were the 124 randomly selected BOIED students of the Northern Iloilo Polytechnic State College, Estancia
