Competencies as Perceived by Grade Vi Pupils at Estancia Central School, Estancia, Iloilo." Unpublished Undergraduate Thesis (Science). Northern Iloilo Polytechnic State College, Estancia. Iloilo, March 2002

Abstract

This descriptive study aimed to determine the teaching competencies of teachers as perceived by the grade VI pupils of Estancia Central School during the school year 2001-2002. It further attempted to find out tie significant differences in the teaching competencies of the teachers as perceived by the grade VI pupil a classified an to certain categories. The study utilized the 198 randomly selected grade VI pupils in Estancia Central School. Estancia, Iloilo. The lottery method of sampling was employed in the selection of the pupils. The research was conducted in September 2001. The data were gathered with the use of the Teaching Competencies Scale which was subjected to validity testing by three research experts and reliability using the test-retest method. The study considered the following areas of teaching competencies: classroom management, motivational characteristics and professional and personal qualities. Descriptive
