ABSTRACT

The Institute of Information and Computer Studies, Estancia Iloilo aims to produce competent computer technology students. This project attempts to improve the current system through the development of a computer based information system. It was found out that the current process used by the Institute of Information and Computer Studies (IICS) Time Management System in monitoring their daily time records is manual based. Thus, Institute of information and Computer Studies (IICS) Time Management System were developed. Stand-alone architectural design was used as the framework of the system that can be launched in a client and server environment. Findings showed that there is a difference between the current system and the proposed system in terms of performance. terms of performance and accuracy of filling the records In iii
