

ABSTRACT

The main purpose of this study was to determine the livelihood of microfinance borrowers from Brgy. Barosbos, Carles, Iloilo. The participants of this study were fifteen (15) borrowers that are purposively selected by the researchers. Specifically, the study determined the livelihood of microfinance to its borrowers, the benefits of microfinance loan, in utilizing their proceeds of their loan, and the experiences on loan application. This study used a qualitative research method. An interview guide question was used as an instrument to gather the needed data. Dominantly the participants are women. The findings further revealed that most of the participants were benefited in engaging from microfinance. Furthermore, it showed that the microfinance was a great help for the borrowers to access to their financial matter.
